# 2021-2022 AUTUMN & WINTER COLLECTION

We are in unprecedented and unexpected times, where we are learning different rhythms of life that help us to face difficulties with more courage and motivation.

Thanks to the invisible and unknown enemy that we are dealing with, we adapted to confinement, spending time with our family, acquiring products in a conscious way, where consuming less and buying what is necessary and vital to subsist places us in the dilemma of saving the economy or saving life. Humankind is vulnerable; there are things beyond our control. Health takes more importance and, not only for our loved ones, also for each and everyone. In Tavex, protection arises for life itself; certainly health care must be reflected in what we use.

To ensure preservation, people are increasing the care of our planet. Consumers are opting for products that can hold their value, that are timeless, with a longer shelf life. Tavex is a pioneer in this matter. Our production process is based on sustainable practices. We do not use harmful substances, which are proven by Oeko-Tex Certification. Our products are always designed with the reduction of water consumption in mind, looking for recycled fibers, new dying techniques and environmentally friendly finishes.

For these reasons, AW/2122 Tavex collection has been created considering the new challenges we face to acquire better consumption habits and give a breath to the humanity and to our home, the planet.

# CARE

*café*

AUTUMN & WINTER 2021-2022

# CARE denim

Tavex joins the effort of preserving our health. We are proud to announce our Care Denim collection that helps to protect against viruses and bacteria. The finish of these fabrics contains silver nanotechnology. Care Denim reduces up to 99% the risk that you or the people in contact with your garments might become exposed. Non treated fabrics allow viruses to be active 1–2 days. Garments made with this technology are able to minimize the risk of transporting viruses inside your home or work place.

This antiviral finish is hypoallergenic. The effectiveness last 30 gentle washes at 40° C–104°F. According to the AATCC 100 method for 50 home washes, shows 99% reduction in bacteria. Tested in method ISO 20743:2013, shows 99% reduction in viruses. Our Care Denim collection is **OEKO-TEX** certified.

A young couple is sitting in a grassy field. The woman on the left is wearing a green jacket over a white top and light-colored pants, with her hands clasped near her face. The man on the right is wearing a white jacket over a dark shirt and blue jeans, sitting with his legs crossed. A light-colored dog is standing in front of them. The background shows a hazy landscape with trees and hills under a cloudy sky.

# EARTH*naturals*

**EARTHY NATURALS - MONARCH**  
99% COTTON / 1% SPANDEX

**EARTHY NATURALS - ALASKA**  
70% COTTON / 22% LYOCEL / 6% ELASTERELL-P / 2% SPANDEX

# EARTHY *naturals*

Tavex is always concerned about the impact of the fashion industry on our planet. That is why we increasingly add sustainable initiatives to our products, such as our selection of natural fabrics with undyed yarns, unbleached and natural colors that will uptrend. Many brands are opting for ecru finishes to increase the sense of balance and contact with Earth.

# PRESERVING OCEANS

*initiative*

AUTUMN & WINTER 2021-2022

# PRESERVING OCEANS *initiative*

The oceans have a fundamental role in the water cycle, in the chemical composition of the atmosphere, and in the moderation of the climate. According to "Science" magazine, 8 million tons of plastic bottles go to the oceans each year. Plastic is one of the most polluting materials for the ocean. It can take up to 1,000 years to biodegrade. By 2050, there will be more plastic waste than fish in the sea. Tavex joins the cause of recycling plastic bottles with the use of **REPREVE®** fiber. With its use, we help to recycle more than 14 billion plastic bottles per year, targeting 20 billion bottles recycled by 2020 and 30 billion bottles by 2022.

**REPREVE®** transforms recycled bottles into an amazing fiber!

PRESERVING OCEANS INITIATIVE - NILO  
89% COTTON / 9% REPREVE / 2% SPANDEX

# NOSTALGIC

AUTUMN & WINTER 2021-2022

*cozy*

# NOSTALGIC *cozy*

Fabrics with the authentic 90's look, without sacrificing the comfort and style that the consumer needs nowadays. Our Nostalgic Cozy fabrics are the perfect combination of modern with retro, to look and feel great.

The main sustainable characteristics of this product family are the recycled cotton percentage used, finishes where water consumption is reduced in both, the fabric manufacturing process and the laundry process, since with low impact wash techniques you achieve the contrasts needed.

## NOSTALGIC COZY - LAYTON

# DOUBLE

AUTUMN & WINTER 2021-2022

*style*

## DOUBLE STYLE - KARMA

66% COTTON / 17% LYOCEL / 16% POLYESTER / 1% SPANDEX

# DOUBLE *style*

Denim with the appearance of knitted fabric that offers softness, flexibility, comfort and resistance to wrinkles. It has a long duration of stability and extensibility, adaptable to all body movements. Perfect for adventurous, relaxed, casual, dynamic, energetic and creative people.

ECC stretch

AUTUMN & WINTER 2021-2022

## ECO STRETCH - NUME

77% COTTON / 13% LYOCEL / 6% POLYESTER / 2% ELASTERELL-P / 2% SPANDEX

# ECO *stretch*

Eco friendly fabrics as a result of their **Tencel®** fiber content instead of conventional cotton, plus greater stretch and recovery that **T400®** fiber provides. These products offer premium looks and deep indigo colors. The aim is keeping the consumer comfortable in their day-to-day life, making them feel freedom of motion, without worrying about the shape of their garment while they contribute to improve the environment.

COTTON  
*less*  
DENIM

# COTTON less DENIM

Tavex has launched a collection of Cotton Less Denim! It is achieved with the use of **Tencel®** fiber instead of the traditional cotton blend. Like cotton, Tencel® is made from plant materials, however its manufacturing requires less energy and water than cotton. As a naturally derived fiber, **Tencel®** is also biodegradable. In addition, Lenzing sources its wood from certified and controlled suppliers to guarantee the sustainable managed plantations.

**Tencel®** has incredible absorption characteristics, it is 50% more absorbent than cotton so it requires a lot less dye than cotton. Also, it is more breathable and less susceptible to odorous bacteria growth.

## COTTON LESS DENIM - ERIKSEN
