DENIM *fever*

Denim Fever! For several decades now, ***denim has been dominating our wardrobes.*** It is considered the number one protagonist item and has demonstrated that it also can be used for a luxury garment.

There is an appetite for denim trends in all its versions, such as loose-fitting silhouettes that have recently reigned over skinny ones and have prominent finishes that will suit nostalgic outfits that bring to mind the nineties and early 2000s. Wide and relaxed jeans also parade in catwalks. The current fashion cycle is littered with extra baggy and extra comfortable styles. The latter also showed cargo denim versions. The flared boot ensured its permanent stay, an undeniable basic that will create ideal wardrobes for the petite silhouette. ***We cannot leave out the classic fits, straight jeans have been in the closet for some time now,*** and although at some point they were replaced by skinny jeans, they have revealed that they have endured over time.

Tavex, positioned as one of the favorite denim manufacturers worldwide, characterized by its continuous research and product development, brings for you a wide range of fabrics that are the perfect match for these new fits and contemporary aesthetics for this autumn- winter. Our inherent heritage and versatile capabilities allow us to ***offer fabrics from the classic vertical slub appearance with premium look,*** as well as the authentic marbled effect for retro style. Moreover, we have engineered new indigo shades to create a color narrative behind the garments. In regard to ***sustainability, all of our products*** have several initiatives since conception, such as US Cotton Trust Protocol certification, reduction in water consumption, the most sustainable indigo in the world, laser sensitive properties for low-impact laundry processes, without the use of harmful chemicals endorsed by the Oeko-Tex certification, among others.

At Tavex, ***the true weavers, we are all visionaries*** and denim lovers. Enjoy our awesome AW2425 collection!

PREMIUM *classics*

Upgraded denim fabrics with vertical faded characteristics, meaningful design, and signed by durability. Over the years, Tavex has developed a tradition and legacy in the denim production process, which reflects in the creation of fabrics of excellence that perpetuate as protagonists.

This family line with natural vertical slubs is designed for a classic style and relaxed silhouettes, versatile enough to process raw or utilizing the most abrasive laundry techniques.

Celebrate how denim changes and improves over time!

BEYOND *indigo*

Color is an experience. Color influences the behavior of each individual and is stronger than we think.

In Tavex, there are no frontiers when we speak about color. Our experience enables us to offer a wide range of indigo shades, combining sulfur tops and bottoms of several colors. To empowering dreamers, we have launched our “Digital Dark” fabrics that offer a digital futuristic mood with black undertones. We have also launched “Vintage Inspired”, promoting aged dyes achieved by brown and olive sulfur shades for dusty colored bases that can create an abraded effect.

RESPONSIBLE *fibers*

Tavex continues to develop in the framework of sustainability, evolving towards a future with an ethic of conscience. This group is integrated by fabrics with special blends and features.

These revolutionary fabrics designed with lower-impact fibers have a modern luxurious appearance that makes them ***relevant for responsible brands, sustainable collections and projects with a conscious vision.***

RECYCLED POLYESTER

We use post-industrial recycled polyester. By choosing recycled polyester fabrics, you achieve the same technical performance while leaving a smaller environmental footprint.

HEMP

Tavex launches its “Denim Vibes” collection! Made from a natural blend of hemp, considered as one of the most sustainable fabrics thanks to its durable properties.

TENCEL®

Fabrics with incredible sensation of softness, warm touch and comfort. Tencel® is made from plant materials. Its manufacturing requires less energy and water. As a natural fiber, it is also biodegradable.

COOLMAX®

Our “Be Cool” fabrics, which are perfect for outdoors, contain Coolmax® fiber. This technology transports moisture away from the body.
